Web Development Projects

Tic-Tac-Toe

Basic tic-tac-toe game written in JavaScript with connections to an API to save and retrieve old games.

Recipe Tracker

Full-stack application to add, edit, search and delete recipes. JavaScript front-end with Ruby-on-Rails and Postgres back-end.

Project 3

Constant Contact | Waltham MA

2008 – 2017

Engineering Manager – Authoring 2011 – 2017

Managed development of Constant Contact's JavaScript and Ruby based 3rd Generation Editor from conception to establishment of 3GE as the default editing experience for all new email marketing trialers.

Engineering Manager – Website 2010 – 2011

Principal Software Engineer – Website 2008 – 2010

Converted the entire Constant Contact acquisition website from JSPs to a Spring and Tiles based architecture. Replaced EJBs with JDBC.

Yellowbook USA | Waltham MA

2008

Lead Developer – New Media Advertising Platforms

Designed and implemented the data access layer of Yellowbook's fully managed search engine advertising program.

GroupGo, LLC | Waltham MA

2007-2008

Senior Software Engineer

Eight person startup developed a travel media site for planning travel with family and friends. Designed and implemented server-side Java code utilizing Spring, Hibernate, and MySQL.
